3 715 €* of pure income
after 1 year of usage

$$*3\,465 + 500 - 250 = 3\,715$$

WARRANTY

FOR METAL FRAME

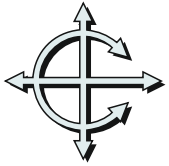

10 YEAR

ABSOLUTE ERGONOMICS

“Synchro mechanism” is the most ergonomic and modern tilting mechanism of chairs for now. Its kinematics corresponds human body anatomy. This mechanism changes the seat declination angle along with backrest declination, according to human body anatomy. That provides proper seating and body support in every position.

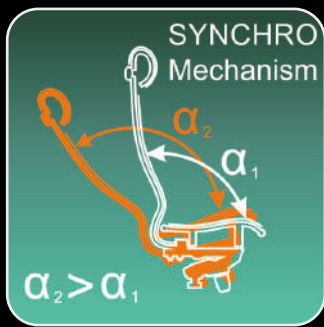

3D REMOVABLE HEADREST

Steel structural frame has absolute ergonomic shape of the backrest and the seat

Independent, synchronized backrest declination allows the person to bend and unbend in proper sitting position, while tilting. That improves legs blood flow, and massages muscles.

Ergonomic Samurai chair accurately adjusts to individual physical characteristics and allows you to take proper position, providing absolute comfort and convenience

Separate seat and backrest tilting with the possibility of locking in each position.

Two-zone lumbar support hardness adjustment

Mesh fabric and perforated NewLeather enables your body to "breathe"

Absolutely ergonomic anatomic shape of the backrest and the seat

For metal frame

Two-zone seat hardness adjustment

Height, depth and tilting angle adjustments of 3D headrests

4D armrest adjustment: height, armrest pad width, armrest pad depth, armrest pad shifting angle

Without any load, chair wheels brake

5 position seat depth adjustment

Shifted tilting center makes it possible to keep feet on the floor when the chair is tilted

5 position backrest recline adjustment

Upholsteries and colors available

Mesh fabric reinforced with aramid fiber

Mesh fabric reinforced with aramid fiber. Polymeric woven fabric with incredible strength and durability. Involving aramid fiber into the fabric increases its strength. Totally eco-friendly and infinitely durable material. Colors available: black, beige, dark burgundi, dark brown, blue, grey

Durable perforated material NewLeather

Innovative eco-friendly material reinforced with nylon fiber, makes fibrous natural basis due to which this material is highly competitive with the natural leather in such properties as elasticity, strength and durability. Moreover perforation provides unique "breathing" properties competitive even with fabric and considerably exceeding "breathing" properties of ordinary natural leather. Colors available: black, beige, dark burgundi, dark brown

He highest quality top-grain leather

The highest quality top-grain leather - is the natural top surface of the hide which provides the most beauty and durability, softy and gracefully supple. The outer section of the skin has a cross arrangement of fibers giving it its high strength, creating the leather's tensile strength. It made from the highest quality raw hides are sourced from cattle. This type of leathers boast superior seating comfort as they are able to breathe. Colors available: black, beige, bordeaux, dark brown

PYTHON EDITION black

Glossy genuine leather with PYTHON EDITION embossing for headrest and armrests samurai chairs

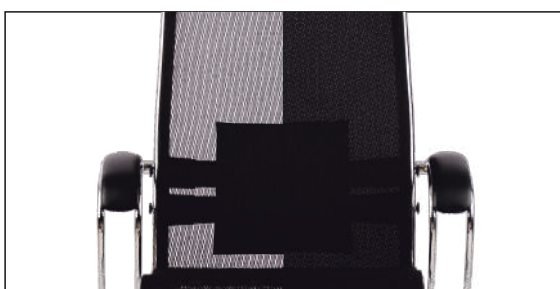

Black Alligator

Eco-leather with «Alligator» embossing for headrest and armrests Samurai chairs

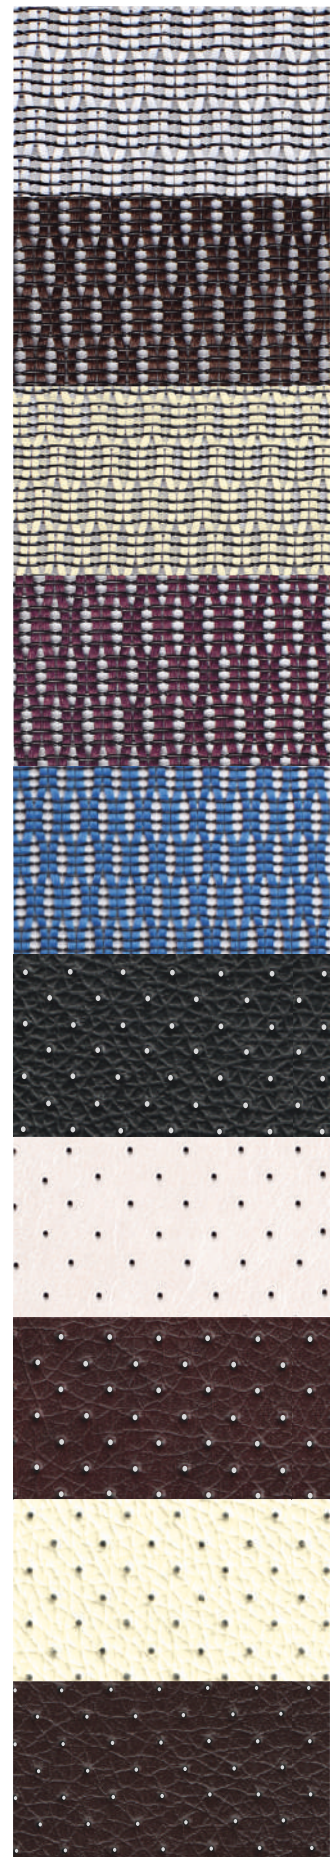

White Swan

Pearly White glittering upholstery "White Swan" is perforated durable material New Leather. All Samurai chairs feature New Leather upholstery

BLACK PLUS

Double-layer mesh fabric makes the Samurai S chairs non-transparent
